AUM	$640mm
Liquidity	Quarterly, 60d notice, 1yr soft lock
Fees	1.75 / 20
Leverage (gross)	6.2x

Manager Comments. Rates were volatile into the January FOMC. Our main loss came from a 2s10s flattener that moved against us as the long end sold off. We reduced duration from 3.4 to 2.1 years ahead of the March meeting and remain cautious on term premium. Liquidity in our core cash-futures basis positions remains good, and margin usage is 38% of available.

Returns are net of fees for the founders share class. Negative returns shown in parentheses. Fictional fund for demonstration purposes.
